On Behalf Of: Environmental Services Unit Environmental Concerns

Comments

At the time of this application, Regulatory Services have received one noise complaint regarding the premises from an occupant of a residential property located above the premises. At the time of the application, the complaint has not been substantiated nor discounted but the case is still open and therefore cannot be ignored.

Given the location of the application premises which is directly below a number of residential flats above, there are concerns regarding potential noise nuisance arising at the properties above. The authorisation of the performance of recorded music until midnight each day of the week and the performance of live music until 10pm on Thursday and until midnight on Friday and Saturday is likely to have a significant detrimental impact on the residents who reside in the flats located above the premises. The complaint already received claims that music, shouting and persons singing can be heard in the properties above which, if correct, demonstrates that noise from both the premises and patrons within carries to the properties above.

As such, there is a likelihood that the activities will have a negative impact on the promotion of the licensing objective The Prevention of Public Nuisance and this department requests that the application be refused.
