

Council Chamber project – update Feb 21

The contract has now been awarded for the refurbishment works to the Council Chamber furniture and the installation of a working system and audio-visual equipment.

The furniture was removed this week and we thought you might be interested to see some photos. The company who are undertaking the refurbishment of the furniture have also given us some information about its history.

Any queries please contact Ruth.

The desks were originally installed in 1960 by a man called Eddie from Kiddie Ltd of Southport. Sadly Eddie passed away a year or so ago, but it is nice to see that his name is still on the skirting board after all these years.

First desk going into the spray shop for rework, leather taken off and first test spray going on.

The Chairs were manufactured by Bambers of Preston, who are no longer trading.
