

Council Chamber project update 9 March 2021

The radiators have now been installed.

The chandelier has been reinstalled.

The gentleman who has refurbished the chandelier has given us some information on its history.

The chandelier frame is older than the glass, probably English, early 20th century.

The glass is 30 to 50 years old, probably Bohemian.

The top section has the bulk of the buttons, their brass pins are pinned in the English style.

The lower section, known as the bag, is pinned in a continental style.

The icicles are a reproduction Regency style popular in 1820.

Gold detailing has also been added
