Performance Management Report	N/A	Susan Guinness Garry Barclay	4

SUMMARY AND LINK TO CORPORATE PRIORITIES

This report demonstrates the progress made so far against the key service developments and performance indicators in the 2011/12 Business Improvement Plan (BIP).

The report shows progress as at the end of January 2012 and therefore covers the first 10 months of the year.

The report also sets out the Partnership's projected out-turn financial position to the end of this financial year.

The Shared Services Partnership is a high corporate priority for both Councils.

RECOMMENDATIONS

That the progress on overall performance, including financial performance is noted

DETAILS AND REASONING

The Shared Services Joint Committee has previously approved the Service Level Agreement which sets out the key outputs required of the Partnership and the individual performance measures against which it will be judged. The Business Improvement Plan translates these outputs and measures into specific deliverables and targets which need to be achieved during 2011/12.

Full statements of the progress made on the key projects and the performance targets as at the end of January 2012 are shown at **Appendices 1 and 2**. The highlights from these statements are expanded on in the body of the report.

EXECUTIVE SUMMARY

34 of the 38 key projects for this year have been completed or are on track and plans are in place to address the remaining 4.

15 of the 39 performance measures are "red" status with mitigating circumstances in each case. Please note than many of the KPIs that have a red status involve the performance of other functions, within both Councils, which is outside the direct control of Shared Services. In these circumstances we are taking action to address issues within our control and also assisting other sections and departments improve performance where it affects the KPIs within our Business Improvement Plan.

The Partnership is also operating well within its approved budget and is currently expected to achieve an under-spend against its budget by the end of the financial year of £0.034m. An explanation is provided later in the report.

KEY SERVICE DEVELOPMENTS

There are 38 key projects included in the BIP which represent service developments for 2011/12. Using a traffic light system, the progress is summarised in the table below.

Detail	Partnership Level	Assurance Services	Financial Services
Green Projects - on track	3	19	12
Amber Projects	0	1	0
Red Projects	0	3	0
Total	3	23	12

The following paragraphs provide commentaries on an exception basis for projects that are considered to have an Amber or Red status, together with proposed actions to bring those projects back on track.

ASSURANCE SERVICES PROJECTS

Red Projects

The roll-out of the **Meritec Fraud Awareness Package** at Chorley was delayed due to some slippage in the update of the Council's Anti-Fraud & Corruption Strategy. However this is now in progress and will be completed by year-end.

The Head of Health, Environment & Neighbourhoods is now in a dialogue with Croston Parish Council to engage them in a **Joint Chorley/Croston Flood Plan Exercise** and this has therefore been carried forward to the 2012/13 BIP to ensure its completion. In the meantime key staff have taken part in a multi-agency flood plan simulation in November which provided validation of both Councils' flood plans.

The original target date for updating **Insurance Manuals** at both host authorities has been extended to the end of March 2012 to enable the new insurance arrangements from January to be taken into account.

Amber Projects

The development of a programme for **Promoting Business Continuity** to local businesses in both host Boroughs is now on hold pending the imminent release of new national guidance in this area. This has also been carried forward to the 2012/13 BIP.

FINANCIAL SERVICES PROJECTS

Red Projects

There are no Red Projects for Shared Financial Services.

Amber Projects

The projects reported as Amber projects have been brought to a conclusion for 2011/12 to allow the Team to focus on the statutory closure of accounts process. The work required to expand training packages for non-financial managers has been carried forward to support and compliment the 2012/13 Business Improvement Plan aims, objectives and projects. The final stages of the common processes for Management Accounting and Budget Management will be finalised as part of the review into roles and responsibilities within the Shared Financial Services staff succession planning and development restructure to be implemented in 2012/13.

PERFORMANCE TARGETS

The BIP contains 39 performance indicators which are all local indicators and draw on the work of the National Audit Office (Value for Money in Public Sector Corporate Services 2007).

Again using a traffic light system, the progress against these indicators as at the end of January 2012 is shown in the table below.

Detail	Assurance Services	Financial Services
Green on target	8	7
Amber – within 5% of target	1	2
Red – more than 5% off target	10	5
Not measured (*)	1	5
Total	20	19

(*) These indicators are reported on a half-yearly or annual basis and as such the performance information of some of these measures are not within this document.

A detailed breakdown of the red and amber targets is shown below:

ASSURANCE SERVICES

Red Targets

These relate to the following indicators:

- % Audit Plans Completed
- (Timely) Implementation of Agreed Management Actions

The former is almost entirely due to workload profiling. A disproportionate amount of annual leave is taken during the first three quarters and there is ample staff time available to complete the remaining elements of the Audit Plans.

The latter also requires some caution. A “zero tolerance” stance is adopted to this indicator as the target set is 100% and therefore a degree of under achievement is almost inevitable. The Joint Committee will also be aware that this requires ongoing attention and action by service managers. Members should be reassured that we are working closely with the Audit and Governance Committees of the host authorities on this and the latest reports to those Committees do actually demonstrate significant improvements in this area.

Amber Target

This relates to an 88% Customer Satisfaction Rating for auditing Shared Services against a target of 90%. Only slightly off target and no significant issues to report.

FINANCIAL SERVICES

Measure	Target to date	Actual to date	Variation
Over/underspends within 1% of manageable/cash revenue budget	+/-1.0%	-2.2%	120%
15 working days from the period-end closure to the distribution of financial reports	100%	93.75%	6.25%
Statutory Grant Claims and Returns to be submitted on time	100%	88.46%	11.54%
Supplier Payment within 30 days	98%	89.1%	9.08%
Supplier Payment within 22 days	85%	81.9%	3.65%
% of supplier payments by electronic means	92%	91.2%	0.87%
% of remittances to suppliers by electronic means	87%	82.0%	5.75%

Red Targets

Over/Under spends within 1% of manageable/cash revenue budget – Both Councils are currently underspending against cash budgets. There are numerous reasons for budget variations occurring within all the costs centres managed across varied departments, functions, spend types and Councils. Overall underspending this is mainly attributable to cost reduction in order to address budget gaps in future years within Medium Term Financial Strategies

15 working days from period end to distribution of financial reports - One set of Budget Monitoring reports were delivered late to budget holders due to delays experienced in receiving payroll data from the provider. Issues are still ongoing with the service provider but we are working proactively with them to enable the payroll data be uploaded into our FMIS.

Statutory Grant Claims and Returns to be submitted on time – Both the RA forms at CBC and SRBC were submitted late. This was caused by the additional work resulting from the first closure following the new International Financial Reporting Standards (IFRS) regime. All subsequent returns have been submitted on time.

Supplier Payments with 30 days (also see 22 days AMBER below) - Target not achieved mainly attributable to non compliance by users and unfamiliarity with processes due to staff turnover in Shared Financial Services. A process of publicising the importance of system compliance is currently underway and is clearly working as the 10 day payment performance target is now on target and payment within 22 days has now reached AMBER. Performance in respect of the supplier payment KPIs is a high priority and the results have already vastly improved and continue to do so, however, this will take time to be reflected in the cumulative target.

The action taken has included increasing the detail of performance monitoring by recording the time taken to complete each task within the whole process which has enabled us to identify the precise points where improvements needed to be made. This has been done in consultation with users and has resulted in a significant improvement in the results. In fact a 100% result has been achieved for payments within 30 days on numerous occasions. The Team are now looking at ways to ensure that this level of performance is sustained at the same time as reverting back to regular process monitoring levels. The new monitoring regime as set out in the last report involving Payment Forecast Reports continues to be used to help prevent invoices not being processed to the desired timescales.

% of remittances to suppliers by electronic means – This KPI is red due to the proportion of remittances sent electronically at SRBC. Previously, with the old FMIS faxed remittances were classed as electronic, however, this method is no longer used since the new system was introduced. Continued development of the new FMIS will improve the number of electronic remittances sent to suppliers. Action being taken to improve performance against this KPI involves the Payment Forecast Report that also provides details of payments due to be made in that day. It also includes an indicator to highlight the payment method i.e. cheque, BACS, post or email. This allows a member of the Team to contact the relevant supplier to ask for an email address or bank details.

Amber Targets

Supplier Payments with 22 days – Please refer to explanation above for Supplier Payments within 30 days

% of supplier payments by electronic means - as part of implementing the new FMIS there has been a push to increase the percentage of electronic supplier payments when suppliers were written to asking for the switch to electronic means to be made. There has been an increase in performance from 82% in April to 88% in May, with a steady increase to over 91% in January 2012. A Payment Forecast report has also been developed which provides details of the payments due to be made that day along with an indicator of whether they will be paid by cheque or BACS and whether remittance advice will be sent by post or email. This allows a member of the Team to contact the relevant supplier to ask them for an email address, or bank details.

BUDGET PERFORMANCE STATEMENTS

At each Joint Committee meeting up-to-date budget performance statements will be presented showing actual performance against the approved original 2011/12 partnership budget. Any variations will be highlighted together with any proposals for either reducing or increasing expenditure accordingly.

The following statement presents the projected out-turn position at 31 March 2012. The original partnership budget for 2011/12 is £1.513m which achieves a budget reduction of £0.221m (13%) from 2010/11. The anticipated out-turn position at 31 March 2011 is currently £1.479m which equates to a budget saving at year end of £0.034m

Cost Category	Annual Budget £000	Projected Out-turn as at 31st March 2012 £000	(Under)/Over Spend £000
Employee Costs	1.449	1.418	(0.031)
Lancashire CC Audit Budget	0.010	0.010	-
Transport	0.014	0.012	(0.002)
Supplies and Services	0.040	0.039	(0.001)
TOTAL	1.513	1.479	(0.034)

Estimated Budget Variations

The current expected underspend against budget is mainly attributable to vacancies in Shared Financial Services.

WIDER IMPLICATIONS

In the preparation of this report, consideration has been given to the impact of the Shared Services performance management arrangements, and the table shows any implications in respect of each of these.

FINANCIAL	The wider implication of the financial performance of the Partnership is the full year impact on both Councils' Medium Term Financial Strategies. Any under-spend achieved at year end against the Partnership's budget will be passed on in total to both Councils by means of a reduced recharge.		
LEGAL	The partnership has been established with an informal structure which has low complexity and a low cost set up. The Shared Services Joint Committee, established under Section 101 of the Local Government Act 1972, provides the overall governance for this with its terms being set out in an Administrative Collaborative Agreement which has been signed by both Councils. Sound performance management arrangements are required to enable the Shared Services Joint Committee to effectively fulfil its obligations. Schedule 1 to this Agreement sets out the Service Level Agreements which form a key part of the performance management arrangements.		
RISK	A full risk assessment is set out in the Partnership Business Improvement Plan for 2011/12.
