

Interface distances calculated on Chorley Planning Departments advice, as follows:

21m + one additional meter for every 250mm over and above a 0.5m difference in relative ground floor levels.

Therefore for a 1m difference in levels:  
 $1000\text{mm} - 500\text{mm} = 500\text{mm}$   
 $500\text{mm} / 250 = 2$   
 $21\text{m} + 2\text{m} = 23\text{m}$  interface distance.
