# Introduction

## What is an Integrated Impact Assessment?

The integrated impact assessment is a tool to ensure that any policy, project or service is assessed to consider any positive or negative impacts for Chorley residents with regards to equalities, health or sustainability. It is important that this is done in a timely manner and ideally it should precede the start of the project, policy or strategy concerned.

## Why do we need to do Impact Assessments?

Chorley Council is committed as a community leader, service provider and employer that we will work to ensure that everybody is afforded equality of opportunity and good life chances. The Impact Assessment is a tool we use to ensure that we fulfil these commitments, and thus meet our legal duties.

## Quick Steps for Completion

1. There are four sections;
  - Equality – This section considers the impact on our 7 equality strands, which are; race, age, gender, sexuality, faith, disability and rurality. When completing this section, reference should be made to the Council's [Equality Scheme](#)
  - Health – the impact on potential health impacts. There is a link in the section to the current public health observatory information
  - Reputation – the impact on the Council's reputation and our ability to deliver our key priorities. Reference should be made to the Council's [Corporate Strategy](#)
  - Sustainability – the impact on environmental and sustainability issues. Reference should be to the [Climate Change Strategy](#)

Each section has a number of questions which should be given a rating, and evidence given for why the rating has been selected.

Code	Description
------	-------------

P	Positive beneficial impact
N	Negative undesirable impact
U	Uncertainty over impact
NI	No specific impact/neutral impact

2. Actions – Once a rating is given, actions should be identified to mitigate any negative impacts or maximise any positive impacts of the policy/project/strategy that is being assessed.
3. Once the toolkit has been completed, changes should be made to the policy/project/service to respond to any actions identified.

## Integrated Impact Assessment Action Plan

If any further actions were identified through the Integrated Impact Assessment then these should be listed in the table below. These should be added to the relevant business/service plan to ensure that any actions are carried out.

Actions needed following Integrated Impact Assessment	Start Date	End Date	Lead Officer
<p>As well as applying the IAA to the overall strategy it also needs to be applied at a more detailed level e.g. individual play and open space schemes. Therefore, individual IIA's will be applied to each of the actions within the strategy (where relevant) prior to implementation. This will ensure that all of the actions have a clear focus on maximising health and well-being outcomes.</p>	2014-15	2019-20	Jamie Dixon
