
Scrutiny Inquiry into Neighbourhood Working

2 What approaches to neighbourhood working should we consider? (Service provider perspective)

Questions likely to be put to witnesses from within Chorley

How are you now achieving neighbourhood working?

Please consider: What do you consider to be a 'neighbourhood'?

What benefits does this bring?

Please consider: How is the service better as a result? Why – what are the key factors in achieving this?

What bodies and agencies are involved as partners?

Please consider: Can you share some examples of success in working co-operatively with partners? What staff from partner agencies are involved – at what level? Do you make decisions jointly?

What other partners do you think should be involved?

Please consider: Who is missing? What value would they add if they were involved? Why are they not involved?

What part do elected members of the District council play?

Please consider: And what role should they play? For example: making decisions; providing leadership; supporting the local community

How are residents involved?

Please consider: At what level do they wish to be involved? Do/can they provide leadership?

Are there extra costs or difficulties that arise from neighbourhood working?

Would you like to see neighbourhood working developed in Chorley?

Please consider: How? And on what sort of scale?

Do you think we should concentrate neighbourhood working on a few areas?

Please consider: if so, how should these be chosen? If not, would it be better to roll out neighbourhood working in a single programme or should it be phased in more gradually?

Is there anything else you would like to add to help the Inquiry panel?

Please use this as an opportunity to add your own thoughts
