

Following the recent fire at the Clayton Hall Landfill site could the relevant portfolio holder please advise the meeting of the following:

1 What items, which are described as Commercial Waste, are currently being tipped?

2 As a result of the fire was there any risk to residents of toxins within the smoke?

3 What is estimated to be the cost to Chorley Borough Council following actions that had to be undertaken and will efforts be made to recover these costs?

4 What mitigation or plans will the site owners be putting in place to ensure that there is no repeat incident?

Yours faithfully,

On behalf of the Conservative Group on Chorley Council
